

# INDEX THEORY

LEIBNIZ UNIVERSITY HANNOVER  
WS 2022/23

Elmar Schrohe  
Institut für Analysis  
Leibniz Universität Hannover  
Welfengarten 1  
30167 Hannover

## CONTENTS

1. Prerequisites	5
2. Fredholm Operators	8
3. Toeplitz Operators	15
4. Fourier Transform and Sobolev Spaces	20
5. Pseudodifferential Operators	25
Continuity	26
Asymptotic expansions	27
Pseudodifferential operators on manifolds	28
Vector bundles	30
Ellipticity and parametrices	32
Index theory for pseudodifferential operators	33
6. Elliptic Complexes	35
7. Connections and Characteristic Classes	42
8. Basics of K-theory	52
The Thom isomorphisms	55
9. Proof of the K-theoretic Index Theorem	57
10. The Cohomological Index Formula	63
References	67
